Number of Children	1	2	3	4
Amount on & after 3/1/14	\$369	\$606	\$750	\$891

Calculation of Survivor Benefits

The benefit amount is based on the earnings of the deceased parent. The more the parent paid into Social Security, the greater the child's benefits will be. The child is eligible for 75% of the parent's benefits.

¹ Generally, rates are based on where the child resides and not which county has jurisdiction. A Los Angeles County child in foster care placed outside of the County receives the rate of the county or state in which that child lives. The only exception is if the host county does not have a specialized care rate, and the child qualifies for a specialized care rate in Los Angeles County. In that case, the child continues to receive the Los Angeles County specialized care rate. This only applies to foster care funding and not AAP. If the child is receiving AAP, the child receives the Los Angeles County rate, or the host county rate, whichever is higher.
